PROFESSIONAL SUMMARY

B.Tech (IT) graduate with hands-on experience in full-stack development using JavaScript, Node.js, MongoDB, and REST APIs. Built scalable web applications during internships and academic projects. Strong foundation in OOP, Agile methodologies, and cloud-based architectures. Published IEEE research papers in Deep Learning and actively exploring AI and Generative AI applications. Passionate about building impactful SaaS solutions.

SKILLS

Programming Languages: JavaScript, Python, C
Frontend: HTML5, CSS3, JavaScript (ES6+), React.js (Basics)
Backend: Node.js, Express.js, REST API Development
Databases: MongoDB, MySQL
Tools & Platforms: Git, GitHub, Postman
Concepts: OOP, DSA, Agile, MVC Architecture, API Integration

EXPERIENCE

Full Stack Intern — Spypro Security Solutions (Dec 2024 – Apr 2025)

- Developed and maintained backend modules, and ensured efficient data handling using database operations.
- Built responsive UI components using HTML, CSS, and JavaScript
- Used Git for version control and feature branching

AI & ML Intern — APSSDC (May 2024 – Jun 2024)

- Developed ML model for employee burnout prediction
- Performed preprocessing, feature engineering, and evaluation.
- Improved prediction accuracy through hyperparameter tuning

EDUCATION

B.Tech (IT), VR Siddhartha Engineering College (2021–2025), CGPA: 7.2

Intermediate (MPC), Sri Viswasanthi Junior College, 82%

SSC, Dr. KKR's Gowtham Concept School, CGPA: 8.5

PROJECTS

CypherShare – Cloud File Sharing Application (Deployed)

Live: <https://cypher-share.onrender.com>

GitHub: <https://github.com/mbalajiyadav/cypherShare-file-sharing-application>

- Developed a file sharing application using Node.js, Express.js, MongoDB Atlas, EJS with RESTful API architecture
- Implemented file upload, unique link generation, and QR-based file access with environment-based configuration
- Integrated cloud database and deployed the application on Render for production use
- Built responsive UI and handled error validation, routing, and file download workflows

Snake Game (Web)

- Developed a browser-based Snake game using JavaScript with dynamic game logic and event handling

Cattle Skin Diseases Classification (Deep Learning)

- Designed and trained a CNN model achieving 90%+ accuracy using MobileNetV2
- Applied image preprocessing and augmentation techniques ,Achieved 90%+ accuracy using MobileNetV2
- Tech: Python, TensorFlow, Keras

CERTIFICATIONS

AWS Cloud Foundations • Cisco CCNA • Programming Essentials in C & C++ (Cisco)
